in ritika-jha06 ritika-jha06 06 April 2004

Results-driven and innovative computer science graduate with a strong academic background and a passion for leveraging technology to solve complex problems. Seeking an entry-level position in the field of computer science to apply my skills and contribute to the development of cutting-edge software solutions.

ACADEMIC PROJECTS

Electricity Billing System Project

- Built a GUI-based desktop application to calculate electricity usage and generate meter info using Java Swing, Applet, JDBC and MySQL.
- GitHub link:** <https://github.com/ritika-jha06/Electricity-Billing-System>

Crime Management System Project

- Developed an online FIR platform enabling users to log, track, update, and manage cases using Python and MySQL.
- GitHub link:** <https://github.com/ritika-jha06/Criminal-Management-System>

HTML & CSS project on making Amazon Clone

- Developed an e-commerce platform mirroring Amazon's core features, including product browsing and shopping cart functionality. Technologies Used - HTML, CSS.
- GitHub link:** <https://github.com/ritika-jha06/Amazon-Clone-Project>

EXPERIENCE

99 Ideas SaaS Private Limited, Pune (Remote)

AI/ML Intern

📅 (May'25 – Present)

- Worked on an offline chatbot application, including backend development and deployment.
- Technologies used: **Python, Django, FastAPI, Gemini API.**

EDUCATION

B.Tech in Computer Science & Engineering AI ML (7.84/10)

Supreme Knowledge Foundation Group Of Institutions, 2026

Higher Secondary Education | Science (88%)

ST Agnes Convent School, 2022

Secondary Education (90%)

Agrasain Balika Siksha Sadan, 2020

SKILLS

Languages

JAVA Python
HTML/CSS Development
MySQL Database MongoDB
Django

Environments

REST API Testing (Postman) NetBeans
VS Code IntelliJ IDEA

Tools

Git

ACHIEVEMENTS
